<ol style="list-style-type: none"> 1. Se q es muy importante q los ninos estén físicamente en la escuela y por lo tanto estoy abierta a un plan de aprendizaje en clase, pero me gustaría saber cuáles serían las medidas de precaución en la escuela? Ejemplo. Cuántos estudiantes en el salón? Cuántas horas? Cuántos días a la semana? Serán obligatorias las mascarillas? Exetera exetera. Exetera 2. As a parent I would need more information on what a day in hybrid learning would look like. Full day half day? What Safety precautions would take place if a child has flu/COVID like symptoms? Who makes the determination when a child should go home if they have symptoms. How will LAS approach different scenarios and what the current climate looks like in January when flu symptoms are still high. Enforcements. I look forward to the opportunity to ask more questions or be provided more information about the hybrid model. 3. I'm not 100% sure this is my final answer. I will be able to give a true answer once I know the schools plan on how students will be managed. 4. ES MÁS BENEFICIOSO PARA ELLOS ESTAR EN LA ESCUELA PERO CON EL VIRUS AÚN ALREDEDOR, CREO QUE EL APRENDIZAJE A DISTANCIA ES UNA MEJOR OPCIÓN. 	<ol style="list-style-type: none"> A. Our decision to continue with distance learning is based on the current purple tier rating for Sacramento County. Of course if the Covid numbers change significantly we would consider sending our children back for hybrid. I found it both concerning and confusing that our decision today must be our decision for the entire semester. Our decision is based on the current Covid numbers, not those in January, February, March, April or May. B. Realmente creo que lo más importante es la salud de las familias tanto casa como el personal de la escuela por eso prefiero la enseñanza a distancia lo que me preocupa de esta opción es si tuvieran que poner otras maestras a nuestros hijos si se diera el caso ya que los niños están muy acostumbrados a sus maestras Hasta el momento, pienso que deberían considerar terminar el año escolar a distancia hasta que sea seguro para todos regresar todos juntos a la escuela sin necesidad de tener riesgos para nadie. C. Please let us know if there is anything we can do to help! This pandemic has highlighted the fact that LAS teachers are the best. D. Me gustaría que regresaran ya después del invierno, cuando ya esté más tranquila la situación. Creo no es buen momento para regresar en está temporada. E. With Flu season around the time they are scheduling the kids to come back I don't feel my kids will be safe. As of today COVID numbers are not low they are rising, ICU units are full. I can't imagine with FLU & COVID together our kids an their families, our school staff will be safe.

Staff NOV

Themes: 1) Need to know more about on-site protocols/hybrid design, 2) Fear/hesitation, 3) Gratitude/trust for LAS

1. What will the distance learning model look like? Will I have the same students? What will my responsibilities look like?
2. This is hard. Love you all. Hanging in there. Barely.
3. I trust that admin. is looking into the CDC guidelines and all factors that go into play when returning to campus. If it is safe for everyone, I agree with moving into Hybrid. I am also ok with continuing with distance learning, if Hybrid is not the safe choice yet.
4. I'd like to see how the hybrid model will be implemented before I know for sure how comfortable I would be teaching with the hybrid model.
5. I'm just really scared to go back and be in a room with a group of students for hours. We can't control the decisions they make outside of school. My grade level and I have been hearing so many of our kids going to parties, hanging out with friends and going on vacations. I know LAS is going above and beyond to gather PPE and I truly appreciate it and feel an immense amount of gratitude, however, hearing hearing all of this from my students is very unnerving. I question how safe I will be at work exposing myself daily to a group of people.

Staff DEC

Themes: 1) Fear/hesitation based on current stats on COVID-19, 2) Need details on on-site PPE protocols, 3) Gratitude for LAS

- A. Thank you for always having us be part of the decision process.
- B. I feel that the board should establish a date that says if things do not improve we call it a distance learning year for the remainder of the academic year. By now most families have figured out a way to make distance learning work for their child. They have established routines that work for them and have made it successful so far. If needed perhaps we can bring small groups of kids that are not being successful at home to come to learn at school with teachers that are willing to be on campus.
- C. I do not feel safe to go back to the classroom with the positive rate that we currently have in the Sacramento area. I think in the future I would like to know that students were vaccinated and still have all the precautions we currently have.
- D. If I'm required to go back, plexiglass around my desk and around the student desks and an air purifier will make me feel a little safe. I also wouldn't feel comfortable at all with more than 10 in a room including myself. I believe there needs to be more than 6 feet between people in doors. There needs to be enough space for movement around a room while maintaining 6 feet.
- E. I am certain that safety protocols will be implemented. As a middle school teacher, it is the teaching component that will be difficult as I will be teaching on Zoom and responsible for students in my classroom who are not part of my Zoom class. I appreciate the work and planning taking place to establish how it will look in MS.

F. I am torn between the options. As a parent of a student who will be in distance learning mode and a teacher that will possibly have covid accommodations, I am concerned about having a teacher that has to divide their attention between roomies and zoomies. I feel that a teacher that focuses on Dile students is best. I know of several teachers that are in this situation and it has been extremely hard to keep both sets of students engaged and learning. I also know that we have worked hard to establish a rapport with our students and families and I feel of roster change will be difficult for all kids and staff involved. At the same time, I am EXTREMELY concerned for the staff that has to go back to work (especially staff that does not feel safe to go back yet.) I know that if I was in that situation I would want the numbers to be as small as possible. Therefore for the safety of everyone involved, I would pick the option that goes with the smallest number of students for the teachers teaching on campus.
